Art Unit: 3743

Applicant's adding new claims 90-123 is acknowledged. Claims 69-87 remain withdrawn for the reasons stated previously.

The reply filed on October 15, 2002 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s): Applicant has not fully disclosed the prior art as required in the previous office action (Paper No. 32, page 7, lines 3-12). No publication or carefully drawn sketch with meaningful legends and explanations has been given. No disclosure of what processes and what fluids have been processed in the prior art have been provided. Applicant's response simply omits any discussing of this particular request for prior art.

It is the Examiner's understanding that documents illustrating this prior art were shown to SPE Lazarus and either Examiner Chandler or Examiner Pryor at some prior interview in this application or one of the two others filed at or near the filing date of this application. The Exhibits were not made or record at that time to this Examiner's knowledge and belief. Please provide the information required in Paper No. 32, page 7, lines 3-12.

This application contains claims directed to the following patentably distinct species of the claimed invention: First species of Fig. 1 and 2,

Second species of Fig. 4,

Third species of Fig. 5,

Fourth species of Fig. 6,

Fifth species of Fig. 7,

Sixth species of Fig. 8,

Seventh species of Fig. 9, (more than one, maybe),
Eighth species of Fig. 10,
Ninth species of Fig. 11 and 12,
Tenth species of Fig. 13,
Eleventh species of Fig. 14,
Twelveth species of Fig. 15 and an indeterminant
number of additional species illustrated in Figure 16-19.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims appear to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

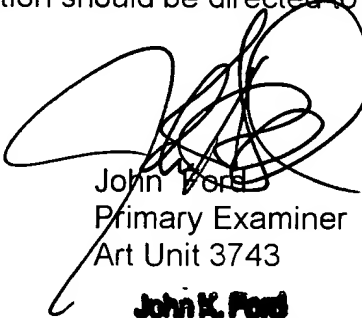

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record

Art Unit: 3743

showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to John Ford at telephone number 703-308-2636.
